**SIGN REPLACEMENT WORK ON I-93 AND I-293  
IN MANCHESTER, BEDFORD AND HOOKSETT**

The New Hampshire Department of Transportation announces sign replacement work is getting underway on Interstate 93 and Interstate 293 in Manchester, Bedford and Hooksett.

This project involves the removal and replacement of signs, sign structures and sign bases along both the northbound and southbound lanes of Interstates 93 and 293. It begins one mile south of the Exit 4 northbound off-ramp on I-293/F.E. Everett Turnpike and continues north to the Hooksett Toll Plaza on I-93. The project also includes the replacement of signs at the I-293 Exit 6 interchange in Manchester, also known as the Amoskeag Circle.

This sign replacement work may require periodic daytime single lane closures between 9:00 AM and 3:00 PM at various locations. Nighttime lane closures, between 10:00 PM and 5:00 AM, may be utilized on I-293 from Exit 4 up to and including the Exit 6 interchange. Changeable message signs will be used along the interstates to alert motorists of any lane or shoulder closures.

Visi-Flash Rentals Eastern, Inc. of Dedham, Massachusetts is the general contractor for the \$802,000 project, which is scheduled to be completed by May 2004.
